

Dear Parent(s),

My goal in AP World History is to educate your child as best I can about the subject. I will use whatever means best exemplify the topics at hand. The main types of methods I will use will be overhead/Power Point, charts, and lecture. There will be a great deal of reading. However, to try and fuse all the material together, the best way for a child to remember tends to be visually. Being that it is generally unsafe to bring in the bubonic plague, Mongol Warriors, and Nomadic Hunters in to an unfamiliar atmosphere surrounded by children, I will use media such as documentaries and movies to exemplify my point. Unfortunately, due to the seriousness of some of the concepts we discuss, there is often an "R" rating on the movie. The PBS movies also have graphic language. I will use these film clips, in brevity, in order to demonstrate some of the severe and serious problems that surround these changes in environment. If you feel that your son or daughter should not be an audience to such demonstrations, please call me and let me know why, or simply refuse to sign this document. Many children believe because they are 17 or 18, they are relinquished from the responsibility of getting a parental note. I have to explain to them; as long as they are in school they are a dependent of you. I explain to them further, if they are independent I would like to see the tax document. (I do not believe a parent would give up the tax benefits in order to allow a child to see a rated "R" movie in school) Even if they are eighteen, it is still a decision that is left to you. Thank you for your time.

Sincerely,

Mr. Bez
